

## XCN/SC

### Cupro-Nickel Sheathed Mineral Insulated Heating Cables for Intermediate Temperature Applications

Cross Cupro-Nickel sheathed single conductor heating cable provides a cost-effective heating solution for intermediate temperatures with excellent anti-corrosive properties.

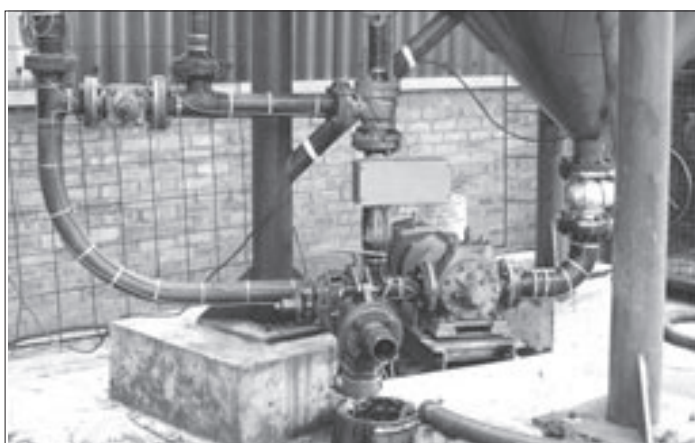

For applications up to 250°C

Fuel Oil Pipework fitted with Internal Heating Cable

Low temperature Trace Heating of Bulk Storage Tank

Trace Heating of Industrial Pipework carrying Grease

Applications up to 250°C

For surface temperatures over 250°C - 'Give Cross a call'
